

Digital Power: How will you use it?

Zilker Labs is changing the way electronics manufacturers think about and use power in their increasingly compact, sophisticated technology applications. Our Digital-DC™ ICs are used in today's most demanding embedded and rack-based systems, where space is at a premium and power requirements vary widely. Using Zilker Labs' digital power ICs, you can create innovative designs that save space, reduce time to market and eliminate traditional design barriers. How will you use this newfound power? For ideas, visit www.zilkerlabs.com.
