

With \$1.9 billion in revenues, Gardner Denver (NYSE: GDI) is a leading worldwide manufacturer of reciprocating, rotary and vane compressors, liquid ring pumps and blowers for various industrial and transportation applications, pumps used in the petroleum and industrial market segments, and other fluid transfer equipment serving chemical, petroleum, and food industries.

Business Need: GDI's corporate legal department needed an automated system to manage over 3,000 documented agreements including Distributor, Sales, Lease, Supplier and Licensing contracts, as well as supporting documents such as amendments, emails, and exhibits that are accessed by the other departments.

Why GDI chose Mumboe: "We're excited to use Mumboe as our contract management tool," says Celeste Taylor, a paralegal at GDI. "We're very pleased that we now have the ability to upload an agreement and automatically extract and edit the data we need to track before it enters our contract database. Mumboe is very user friendly and provides a one-stop resource for questions regarding our many commercial agreements."
